virtual |'və:tʃu(ə)|, |'və:tjʊəl|

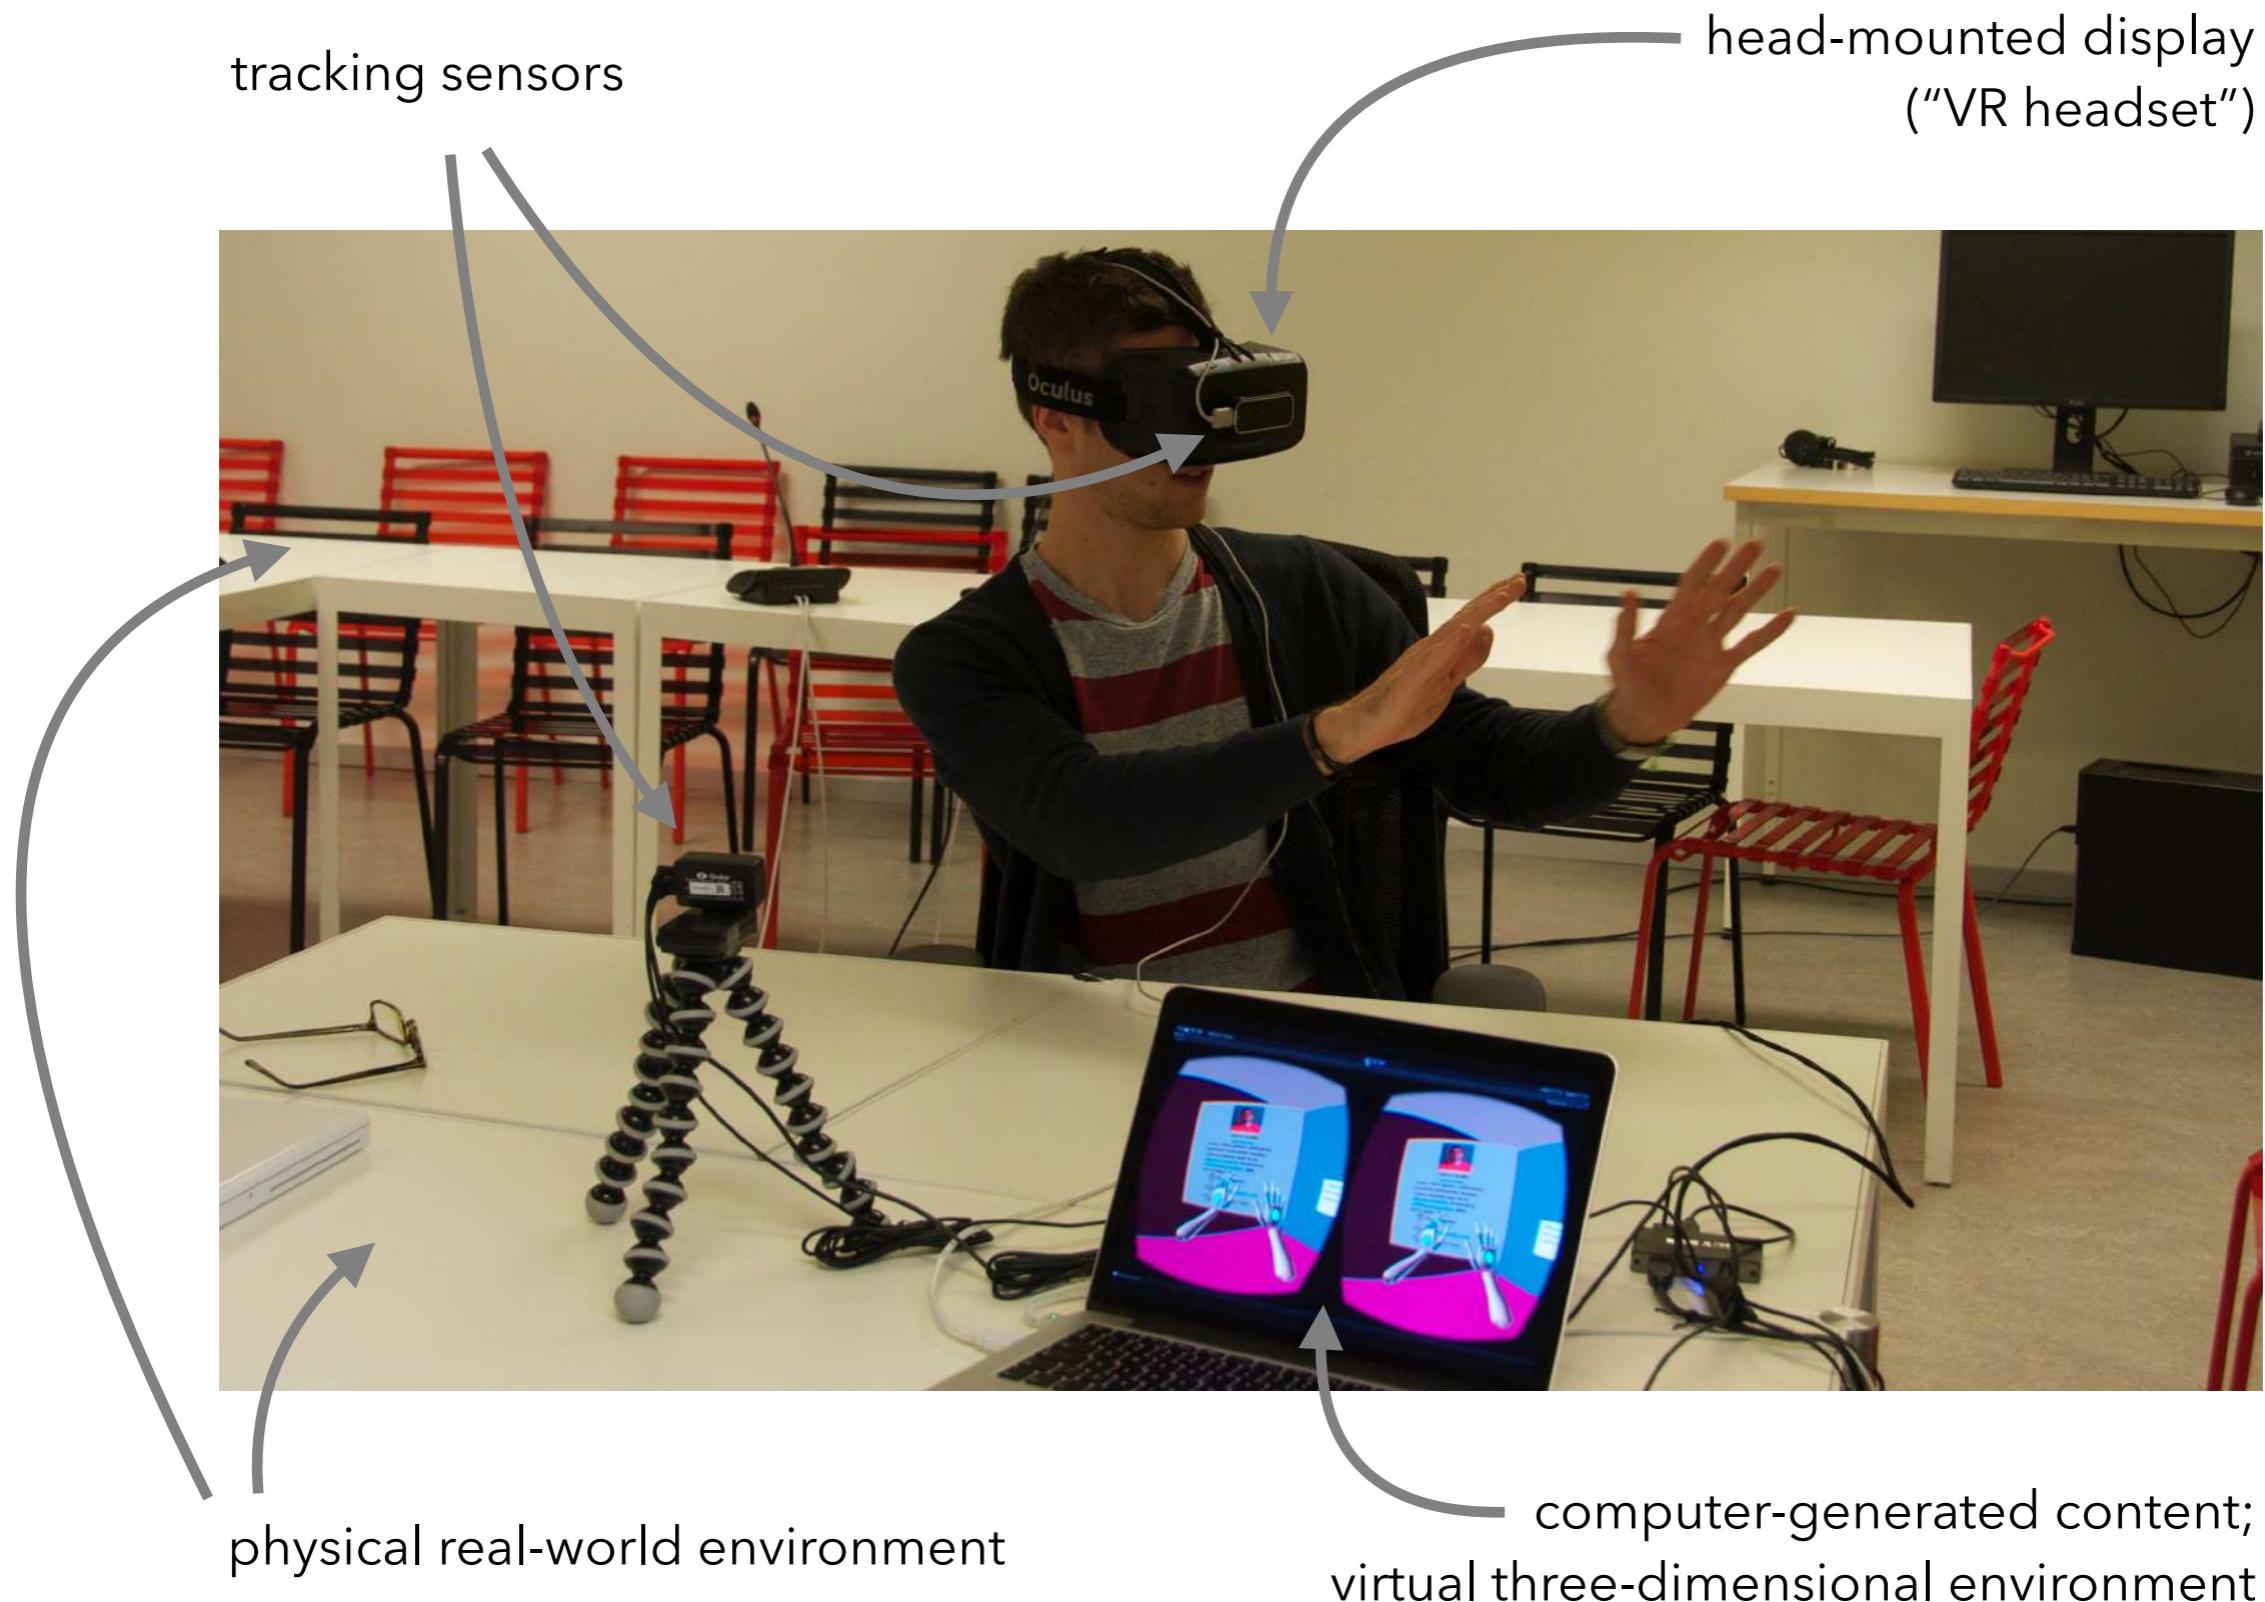

almost or nearly as described, but not completely or according to strict definition

Computing not physically existing as such but made by software to appear to do so

virtual reality

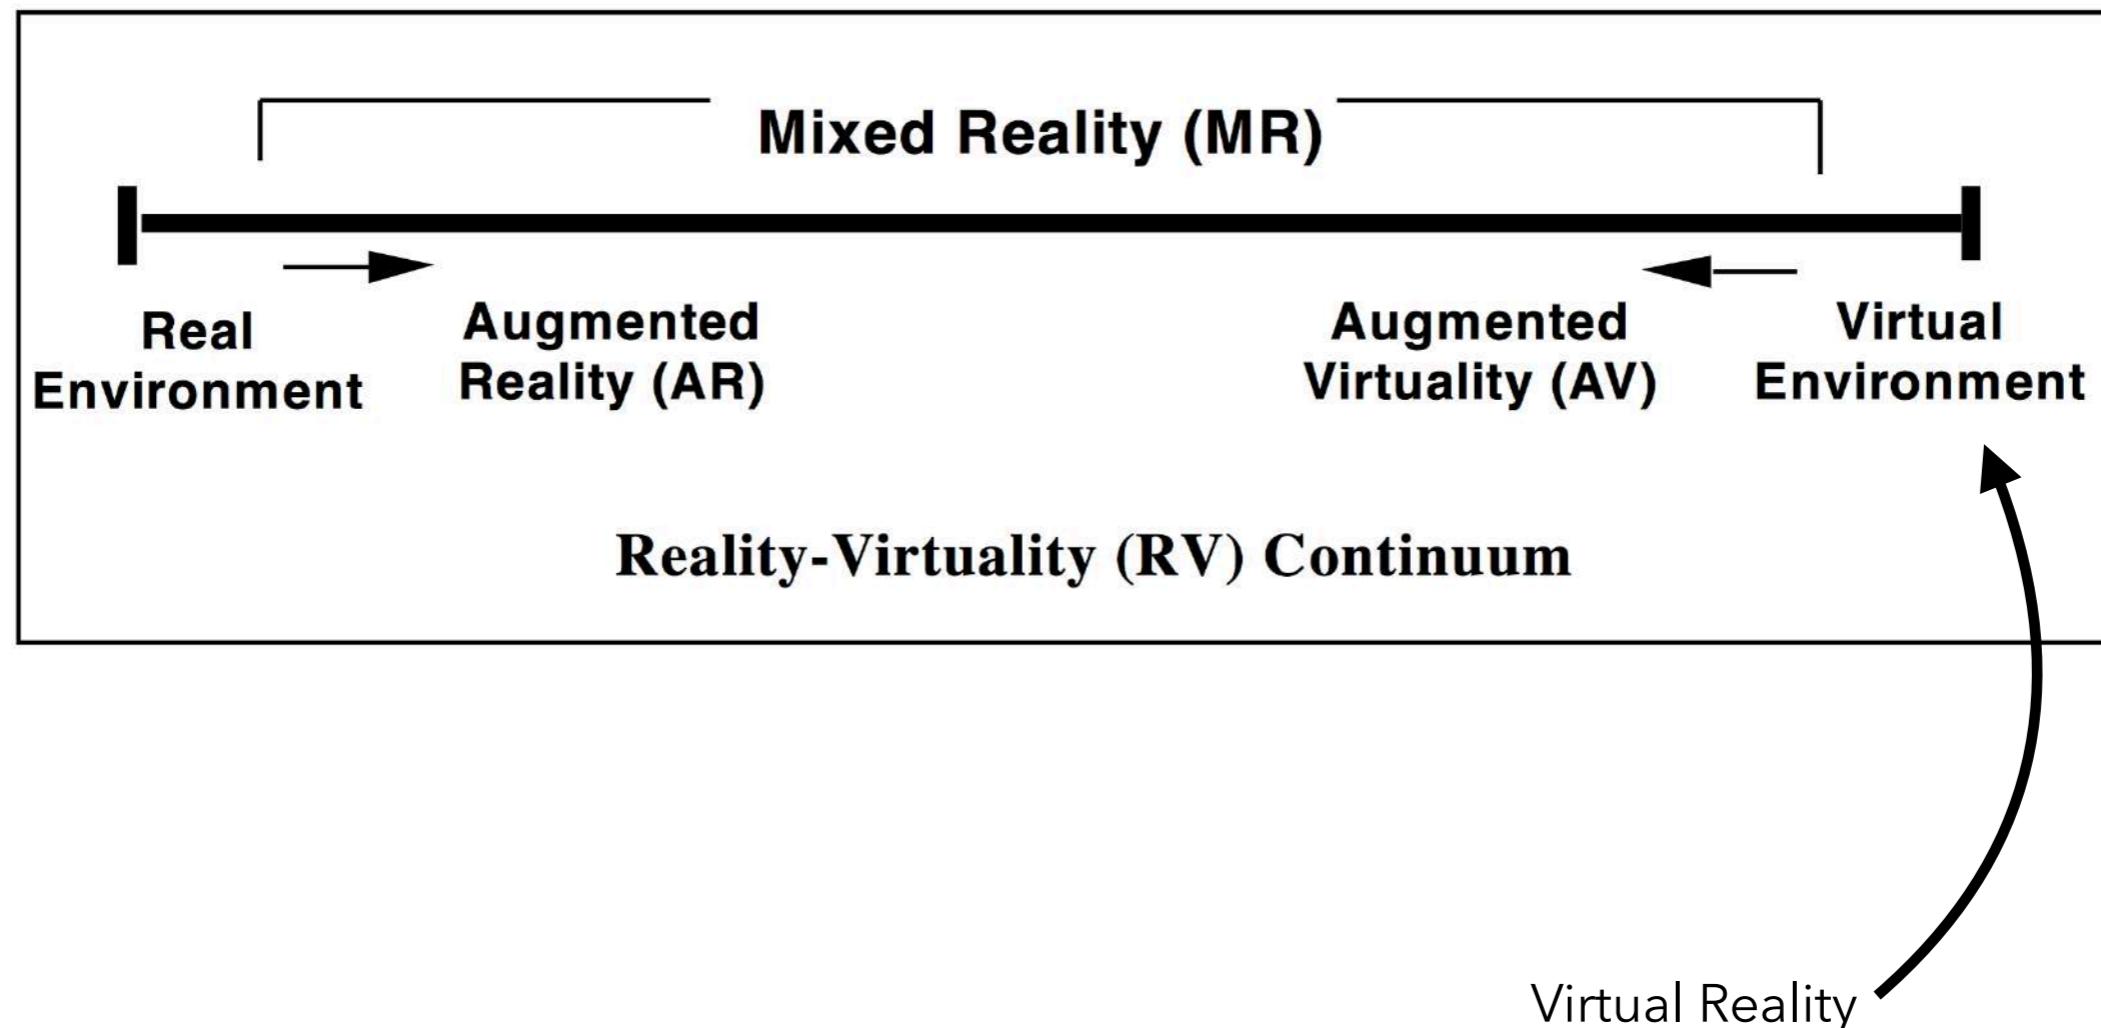

noun [mass noun]

the computer-generated simulation of a three-dimensional image or environment that can be interacted with in a seemingly real or physical way by a person using special electronic equipment, such as a helmet with a screen inside or gloves fitted with sensors.

Virtual Reality (VR)

Immersion

"Immersion refers to the objective level of sensory fidelity a VR system provides."

Presence

"Presence refers to a user's subjective psychological response to a VR system."

User feels like being **in** the virtual world.
